🏠 Unter-Sidhalden 3, 6010 Luzern, Switzerland - (Willing to Relocate)
🔗 <https://christopherjulien.github.io/ThisIsChris.github.io>

Driven to bring robotic automation and autonomy to solve industry problems. Expertise in mobile robotics, robotic programming, and data in Internet of Things.
I bring a multicultural and multidisciplinary approach to problem solving. If there's time for it, you'll find me adding home automations, or in the mountains flying my drone.

WORK & ENTREPRENEURIAL EXPERIENCE

Feb 2025 – Ongoing	Software Engineer Intern at Witty Machines <i>Worked alongside highly technical team on expanding the frontier of factory automation with robotic arms. Trained various computer vision models for object detection, instance segmentation for produce quality control and robot trajectory planning. Performed factory field tests for product benchmarking.</i>	Zurich - CH
Jan 2024 – Feb 2025	Entrepreneurial Innovation and Prototyping <i>Dedicated the past year to entrepreneurship, focusing on prototyping, ideation, and hands-on development of innovative business concepts. Collaborated with SRL to apply for an SNSF BRIDGE grant, proposing a soft robotics solution for underwater munitions removal.</i>	Luzern - CH
Jun 2023 – Dec 2023	Harvard University Research Scholar at Bertoldi Lab Group <i>Developed, and automated testing on novel analog fluidic computations systems for soft robotic. Assembled computing device, and integrated CAD pieces and 3D printed parts. Calibrated sensors, and scripted custom hardware software. Validated our physical build against numerical model.</i>	Boston - USA
Jan 2023 – Mar 2023	Volunteer Research Assistant at RSL – Autonomous River Cleanup <i>Worked on robotic manipulation with Nvidia's Isaac Gym/Sim environments, and setup docker-containers to facilitate Nvidia environment and hardware setup.</i>	Zurich - CH
Sep 2022 – Dec 2022	Mechatronics Engineer Intern at Pors & Rao <i>Coded, and tested Maxon motor controls for improved position and velocity control. Collaborated cross-functionally to integrate mechanical, electrical and software component securing redundancies and ensuring reliability for high-profile robotic art exhibitions.</i>	Bangalore - IN

EDUCATION

Sep 2020 – Dec 2023	EPFL Masters in Robotics with Minor in Data in Internet of Things Master Average: 5.23/6 Master Thesis: <i>Analog Fluidic Networks: Towards computational non-electronic systems</i> – 5.75/6 Semester Project: <i>Sensor fusion on self-reconfigurable modular robots</i> – 5.75/6 Semester Project: <i>Combined Approach for Motion Learning and Obstacle Avoidance</i> — 5/6	Lausanne - CH
Sep 2016 – July 2020	EPFL Bachelors in Microengineering	Lausanne - CH
Sep 2019 – July 2020	Vienna University of Technology <i>Fellowship with Movetia awarded on first year academic marks.</i>	Vienna - AT
Sep 2003 – July 2015	Alliance Academy International School, Quito Ecuador	Quito - EC

SKILLS

Coding Libraries: *Pandas, Numpy, Matplotlib* Embedded Systems: *Arduino, RaspberryPi*
Programming Languages: *Python, C/C++* Presenting Tools: *LaTex, PowerPoint, Microsoft Excel*
Developing Tools: *Docker, IsaacSim, Gazebo, ROS2*
Fluent in English, French, Spanish, and proficiency in Swiss/German (B2).

EXTRACURRICULAR ACTIVITIES

2023 – 2023	Participated at Harvard's GRID innovation seminar hosted by Harvard Business School
2019 – 2020	HOLA - (Founder & President) – First Association for Latin Americans at EPFL
2021 – 2022	EY's <i>Chase the Case</i> Finalist and Monitor Deloitte's <i>Case Challenge</i> Finalist

ATHLETIC ACTIVITIES

Harvard's Rhino League Volleyball Champion, Boston Half Marathon, Tennis USTA-4.5, Trekking ABC Himalayas.
