

Christopher Julien Stocker

stockerjulien@gmail.com | +41 77 4030 404 | Dual Swiss Citizen | Zurich

 <https://julienstocker.github.io/ThisIsJulien.github.io/>

I spend my time imagining the future and finding ways to build it. I specialize in robotic software development and hardware integration. You'll usually find me debugging code, designing hardware, or exploring the alpine trails in my backyard.

WORK EXPERIENCE

Aug 2025 – Present	Stealth Startup <i>CoFounder; Building embodied sensing and data infrastructure for robot foundation models</i>	Zurich - CH
May 2025 – Aug 2025	Machine Learning and Data Annotation Specialist at UpCircle - Organizing, and evaluating training data for contaminate detection in recycling facility. - Over >15% mAP improvement in plastic contaminate detection for recycled cardboard.	Zurich - CH
Jan 2025 – May 2025	Software Engineer Intern at Witty Machines - Trained and deployed 2+ YOLOv5/Detectron2 models achieving >90% mAP for real-time quality control inspection using robotic arms. - Developed ROS2-based CV pipeline integrating motion planning on Ufactory robots - Supported 2 pilot deployments at customer sites; improved pick-and-place throughput by 200%	Zurich - CH
Jan 2024 – Feb 2025	Bridge Grant for soft robotic solutions Co-led the proposal and strategic positioning of a national grant (SNSF BRIDGE) for underwater robotics for underwater monitoring, garnering support from leading robotics professors at EPFL and ETH.	Luzern - CH
Jun 2023 – Dec 2023	Harvard University Research Scholar at Bertoldi Lab Group - Built integrated hardware/software systems facilitating parallel control of 6+ devices Automated testing workflows for analog fluidic computing, reducing R&D cycle time by over 50%, and enabling consistent, high-throughput characterization of nonlinear fluidic networks.	Cambridge - USA
Jan 2023 – Mar 2023	Volunteer Research Assistant at RSL – Autonomous River Cleanup - Developed tasks in Isaac Gym/Sim for robotic manipulation - Set up GPU environments with Docker + NVIDIA toolchain	Zurich - CH
Sep 2022 – Dec 2022	Mechatronics Engineer Intern at Pors & Rao - Programmed Maxon motor controls with C++ & Python - Integrated and tested mechanical-electronic system	Bangalore - IN

EDUCATION

Sep 2020 – Dec 2023	EPFL Masters in Robotics with Minor in Data in Internet of Things Master Average: 5.23/6 Master Thesis: <i>Analog Fluidic Networks: Towards computational non-electronic systems</i> – 5.75/6 Semester Project: <i>Sensor fusion on self-reconfigurable modular robots</i> – 5.75/6 Semester Project: <i>Combined Approach for Motion Learning and Obstacle Avoidance</i> – 5/6	Lausanne - CH
Sep 2016 – Jun 2019	EPFL Bachelors in Microengineering	Lausanne - CH
Sep 2019 – Jun 2020	Vienna University of Technology <i>Fellowship with Movetia awarded on best first year academic marks.</i>	Vienna - AT
Sep 2003 – Jun 2015	Alliance Academy International School, Quito Ecuador	Quito – EC

SKILLS

Coding Libraries: <i>Pandas, Numpy, Matplotlib</i>	CV Frameworks: <i>OpenCV, Detectron2, Yolo/NAS, RT-DETR</i>
Programming Languages: <i>Python, C/C++, Pytorch</i>	Embedded Systems: <i>Arduino, RaspberryPi</i>
Developing Tools: <i>Docker, IsaacSim, Gazebo, ROS2, Ubuntu</i>	Presenting Tools: <i>LaTeX, PowerPoint, Microsoft Excel</i>

Fluent in **English, French, Spanish**, and proficiency in **Swiss/German (B2)**.

EXTRACURRICULAR ACTIVITIES

2023 – 2023	Participated at Harvard's GRID innovation seminar hosted by Harvard Business School
2021 – 2022	Zurich's EY <i>Chase the Case</i> Finalist and Paris's Monitor Deloitte's <i>Case Challenge</i> Finalist

ATHLETIC ACTIVITIES

Trekking Annapurna Base Camp Himalayas; Boston Half Marathon; Harvard's Rhino League Volleyball Champion 2023.
